

In 2003, KC SAPP was formed to consider strategies for improving awareness and resources for suicide prevention.

For nearly 20 years, KC SAPP's board members have focused on bringing the latest knowledge and research about suicide prevention, screening, assessment, and treatment to Kansas City's mental health community.

Today, KC SAPP is working to expand community collaboration, advance science and outcomes related to suicide assessment and treatment, and increase education and community for area mental health providers.

The lunch and learns are great because they do not interfere with my client schedule, and the information provided in just an hour I have found to be very helpful. – Kyle Roste, LCSW

The [online training events] are very well done and had important and interesting content helpful to my practice. –Holly Benson, LCSW
